

Word guessing game

This is a simple Word Guessing Game in which the program contains some words in which the player has to guess the secret word within three attempts. If you can not guess the word in three attempts then you will lose the game.

About the project

1. In this game the computer chooses the secret code randomly.
2. The assigned words are displayed to the player.
3. The player has 3 attempts to guess the secret word.
4. If the player guesses the word within three attempts then the player wins the game.
5. If a player does not guess the word in three attempts then the player loses the game and the game is over.

Technologies Used

- Python

How to run

1. Python must be installed on your device.
2. Run the python file: `python word_guessing_game.py`
